

No More Slip Slidin' Away

District Repairs Roads in Campbell and Boone Counties

District 6 has been taking care of some pesky slides over the past few months. The below picture was taken on KY 237 (Pleasant Valley Road) in Boone County and the picture on the left was taken on KY 915 (Licking Pike) in Campbell County. Both projects required more than 200 rails to stabilize the slides.

Drive Smart Child Passenger Safety Seat Inspections a Success

In support of Child Passenger Safety Month in Kentucky, 12 safety seat technicians checked 30 vehicles at a Florence fire department on February 15.

Erin Eaton, Drive Smart Child Passenger Safety Coordinator, stated that "we have found over a 90% misuse rate across the state of Kentucky." She continued by saying, "If the child seats are used correctly they are 69% effective in reducing the need for hospitalization."

"I wanted to make sure my car seat was the safest it could be for my children," said Allison Drummay. She and her one year old son came for the inspection. "This was time well spent," she added.

Pictured is Brandon Muravchick, Drive Smart Coordinator and Meghan Estabrook, NKADD Highway Safety Liaison inspecting a child safety seat.
